July 2026 marked another strong period of growth for **Amazon India**. Organic sessions reached a total of **8,478**, representing a change of **+2.1%** compared to the previous period. The site's ability to capture high-intent search traffic continues to improve, driven by solid technical health (scoring **91/100**) and an expanding footprint of authoritative backlinks.

Our active keyword strategy has successfully pushed **64** keywords into the first page of search results. We observed positive movement across several core commercial intent phrases, directly contributing to the increase in organic visibility and user acquisition. While the E-commerce sector remains highly competitive, Amazon India is tracking ahead of our internal market benchmarks and is well-positioned for continued scale in the upcoming quarter.

Key Performance Metrics

The chart below illustrates the trajectory of organic traffic (sessions) arriving at your website over the historical reporting period. Sustained upward trends indicate successful content and ranking strategies.

TOP LANDING PAGES	EST. CLICKS	EST. IMPRESSIONS	AVG. CTR	POSITION
/ (Homepage)	2,374	35,608	8.4%	3.2
/services	1,526	23,738	6.7%	7.1

Based on the data collected during this reporting period, we have identified the following strategic priorities to maximize your search visibility and ROI.

HIGH PRIORITY

Resolve 8 Technical Issues

Technical errors act as a roadblock for search engines. Fixing broken links and slow load times will immediately improve crawl efficiency and user experience.

HIGH PRIORITY

Scale Link Acquisition Strategy

With 4,25,000 links, we must continue closing the gap with top competitors. We recommend targeting 15-20 high-quality contextual links in the next 30 days.

MEDIUM PRIORITY

Expand Top 10 Coverage

You currently have 64 keywords ranking on Page 1. Our focus will shift to optimizing the content for the 208 keywords currently sitting on Pages 2 and 3.

LOW PRIORITY

Enhance Click-Through Rates

We will test new title tags and meta descriptions on your top 5 performing landing pages to improve the organic click-through rate from the search results.

A quick reference guide to help you understand the metrics and terminology used throughout this report.

Organic Sessions

The total number of visits to your website originating from non-paid search engine results (like Google or Bing).

Domain Trust / Authority

A score (typically 1-100) predicting how well a website will rank on search engines, based heavily on the quantity and quality of its backlinks.

Backlink

A hyperlink from a third-party website pointing to a page on your website. They act as "votes of confidence" for search engines.

Referring Domain

The unique website that a backlink comes from. Getting 10 backlinks from 10 different referring domains is generally better than 10 links from a single domain.

Top 10 Keywords

Search terms for which your website appears on the first page (positions 1 through 10) of Google's search results.

Click-Through Rate (CTR)

The percentage of people who click on your website's listing after seeing it in the search results.
